

**INTRODUCES:**

# PASSPORT

Service Communications of Acadiana is introducing Passport, a wide-area radio network. Passport is an affordable and reliable radio service using Motorola's proven two-way technology to bring your business communications to a higher level of efficiency. By using Passport you will instantly be connected to all employees regardless of their location. As your employees move throughout the coverage area, the radios will automatically roam to the nearest tower for clear, private communications. For approximately 1/3 the cost of cellular, Passport will help you take control of your airtime expenses and know how much you are spending without the worry of per minute billing.

## Coverage Area:

The coverage on this map is approximate. Actual coverage may vary due to subscriber equipment used, terrain, and atmospheric conditions. Use this map as a reasonable representation of coverage.

## Product Benefits:

- Saves you money on airtime charges.
- Low fixed monthly rate with unlimited airtime.
- Privacy within your own business.
- One-to-many group calling keeps everyone in touch.
- Rugged, reliable Motorola subscriber units.
- No wasted time reviewing confusing cellular bills.
- Eliminates employee private conversations between family and friends.
